Rusel Portes

Full-stack Developer

ruselportes21@gmail.com Talibon, Bohol, Philippines github.com/ruselportes
linkedin.com/in/ruselportes

SUMMARY

Full-Stack Developer and BSIT student with hands-on experience building and deploying web and mobile applications using React, TypeScript, Node.js, Laravel (PHP), and MySQL. Skilled in designing REST APIs with JWT authentication, containerizing apps with Docker, and deploying to cloud platforms (Azure, Railway). Uses AI-assisted development tools to ship faster. Eager to contribute to a collaborative remote team while growing in full-stack development, CI/CD, and AI integrations.

EDUCATION

Bachelor of Science in Information Technology (BSIT) 2022 – Present

Trinidad Municipal College

Core Coursework: Software Engineering, Database Systems, Web Development, Mobile Application Design, System Architecture.

TECHNICAL SKILLS

Frontend
React, TypeScript, JavaScript (ES6+), Vite, HTML5, CSS3, Tailwind CSS, Remotion

Backend & APIs
Node.js, Laravel (PHP), REST APIs, JWT Authentication, ASP.NET Core (C#), Python FastAPI

Mobile & IoT
React Native, Expo, Android Development, Arduino IDE, ESP32 microcontrollers

Database & Cloud
MySQL, SQL Server, Supabase, Azure Cloud, Railway

DevOps & Tools
Docker, Nginx, Git & GitHub, AI-Assisted Workflows

FEATURED PROJECTS

NeoFit Fitness Gym Admin Dashboard

React, TypeScript, Laravel, MySQL, Docker | Full-Stack Developer

- Built a gym administration dashboard for membership management, check-in tracking, and operational workflows.
- Developed a Laravel REST API with JWT authentication integrated with a responsive React/TypeScript frontend featuring dark/light theme support.
- Containerized the entire application with Docker for streamlined deployment.

LocalAI TikTok Generator

Remotion, CrewAI, FastAPI, Ollama, Docker | Lead Developer & AI Architect

- Created an automated video generation pipeline producing short-form TikTok content using local AI models, eliminating third-party API costs.
- Orchestrated multi-agent LLM task automation with CrewAI for scriptwriting and asset planning.
- Served the application through a Python FastAPI backend with programmatic video rendering via Remotion.

Health Records System (Freelance Client Project)

Laravel, PHP, MySQL, Tailwind CSS, PWA | Freelance Full-Stack Developer

- Built a maternal and child health records system for a private client, with patient registration, prenatal tracking, and immunization schedules.
- Added SMS reminders, real-time chat, and offline support as a Progressive Web App (PWA).

Foodhub (Food Delivery Web System)

ASP.NET Core, C#, SQL Server, Azure | Backend Developer

- Developed a complete online food ordering platform with secure user logins, restaurant menus, cart operations, and order status updates.
- Integrated a SQL Server database and hosted assets securely on Azure Cloud services.

CORE COMPETENCIES

AI-Augmented Workflows

- Experienced in leveraging AI agents and LLM-assisted pipelines to speed up feature planning, debugging, and styling.

Problem Solving & Adaptability

- Quick to learn and apply new technologies, spanning web development, IoT hardware integrations, and AI orchestration.

Clean Code & Design Patterns

- Focused on modular code architecture, responsive UI design (BEM, CSS grid/flexbox), and API security best practices.
